

**LED FLASHING DESCRIPTION OF A RECHARGEABLE TRANSPONDER**

LED Flashing color/pattern	Description
Flashing ...times green	Minimum ... days left before the battery is empty
Flashing red (not on the charger)	Less than 1 day of functioning left
Continuously red	The transponder can stop working at any moment
No Light	Transponder discharged or switched off
Flashing red (on the charger)	Transponder is charging
Continuous green (on the charger)	Transponder fully charged

**IMPORTANT:**

- Charge the transponder at least every 3 months.
- Do not charge longer than the full charging time as this will reduce the life time of the battery.
- Consult the knowledge base of the related transponder for the full specification.
